

IWOfurn Integration

Concentrate on your core business

We will help you using ours

IWOfurn - Integrated World of Furniture

IWOfurn efficiently and flexibly combines companies, information and processes. IWOfurn offers electronic communication for all cross-company processes from the initiating of business, through provision of product information to Order2Pay business transactions.

The task is to network existing infrastructure and software in trade and industry. IWOfurn offers solution components to network the processes of business partners along the value creation chain for local use or as ASP service portfolio.

IWOfurn supports companies irrespective of size and technical requirements. Rational cooperation thanks to technology standards! IWOfurn interconnects heterogeneous technologies.

IWOfurn – potential benefits

IWOfurn reduces the cost-intensive and error-prone manual processing of data, the time lost in transmission and the associated absence of up-to-date information. Orders between customers and suppliers are handled electronically, thereby saving time and costs.

IWOfurn – your advantages at a glance

- Less redundant manual data processing and subsequent processing
- Shorter throughput times due to automation
- Better quality and therefore usability of the information provided
- Optimised access to the latest information of the business partner
- Greater transparency due to the possibility to track cross-company business processes
- Secure investment by incorporating existing IT infrastructures
- Reduction, simplification and standardisation of complaints management

IWOfurn for the trade

From wide product choice, through high supply reliability to innovative quality assurance!

You would like to present your customers with a virtually Unlimited range of both simple and varied products?

Extend your range but not your floor space! The digital and current catalogues in IWOfurn ideally supplement your range at the Point of Sale and systematically rule out the possibility to order goods which are no longer available.

Use catalogue data electronically and optimise the handling of business with industrial partners?

Through the direct access to current digital catalogues you simply select correct product and price information by mouse click and accept this into your merchandise management system.

You will be immediately informed about changes in the digital catalogue data! Multiple entries are a thing of the past; complaints and the associated follow-up costs are reduced!

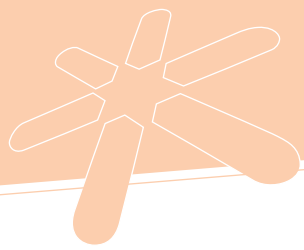

Reduce the order handling times in favour of faster delivery!

The creation and entry of order, supply and invoice forms is essentially automated! You send and receive transaction data electronically to and from your business partners!

A zero complaints ratio may perhaps not exist but a far lower ratio definitely does!

Incorrect deliveries due to incorrectly entered product information or errors due to the manual processing of transaction data are now a thing of the past with IWOfurn.

When are the ordered articles coming?

Answer this customer inquiry fast and reliably! With IWO-furn you track the status of ongoing orders from Order-2Pay – from the order to the payment.

Processing information eats up time and costs?

IWO-furn releases your company from routine work because you exchange electronic business data from your software directly with your business partner. Information is no longer entered manually but can be exchanged directly and consistently between your applications and those of your business partners. The extensive automation noticeably takes the pressure off your staff.

From optimised business processes, through innovative quality assurance to higher customer loyalty!

IWO-furn added value – partner recruiting

If a trading or industrial company is not making much progress in the networking activities with a potential business partner he can request the support of the partner recruiting team via the IWO-furn community.

This partner acquisition then contacts the respective company and organises all the necessary steps from network inquiry through the exchange of test data to incorporation in productive operations.

IWO-furn added value - eBilling Center

Electronic exchange of invoice data in accordance with the requirements of the current Turnover Tax Act. Forwarding and receipt of the electronically signed invoices both as EDI and as PDF file. There is no longer any need to process the collective invoice list which usually accompanies the EDI invoice data exchange. Protection of existing investments through integration into existing processes and organisational structures. Optional archiving of master data and transaction data as well as other information from the IWO-furn System. Alternative integration of existing archiving solutions or use of an IWO-furn archiving solution or use of IWO-furn ASP archiving service

IWO-furn added value – ROI analysis

A flexible ROI calculator is available for every user registered With IWO-furn as standard free of charge which can be set independently by the user to the individual circumstances in accordance with the specific framework conditions. This means that every process (e.g. master data update, order processing, invoice checking) from every corporate area (e.g. purchasing, sales, financial accounting etc.) can be shown, weighted and assessed.

Get in touch with our Marketing Team at marketing@iwo-furn.com or +49 (0)7031 4617 450 if you have any questions or would like further information on the subject of IWO-furn Integration and the resultant added value for your enterprise.
