

IWOfurn Messaging Center

Concentrate on your core business

We can help you with ours

Electronic data exchange with your business partners

Electronic data exchange by EDI can be put to good use practically everywhere. Companies operate according to structured organisational processes and nowadays have network access with suitable hardware equipment. EDI can also be used today cost effectively by smaller enterprises for the rational transfer and exchange of master, order, invoice and financial data, for example. EDI offers you clear competitive advantages for operative day-to-day business and for strategic objectives:

Automated fault-free business processing

From supply inquiry, through order placement, purchase planning, production control, sales promotion and transport logistics to payment settlement.

Less manual data entry work

All necessary business data are electronically available in digital structured form.

Improved data security

Information can be protected electronically throughout and processed voucher-free.

Lower process costs

EDI reduces the cost of staff, material and finance on a broad level.

Reduced error processing costs

Entry errors, delays and transfer problems are almost completely a thing of the past with EDI. The number of complaints is distinctly reduced.

Lower market entry barriers

EDI facilitates the development and extension of relationships to new customers, suppliers and markets.

Improved conditions

Competitiveness is strengthened by the close and efficient cooperation with your suppliers and customers. You frequently achieve more favourable purchasing and sales conditions.

Lower stock costs

Electronic access to exact and current planning data enables efficient order and production planning and therefore leads to optimised stock levels and costs.

IWOfurn - Integrated World of Furniture

IWOfurn efficiently and flexibly combines companies, information and processes. IWOfurn offers electronic communication for all cross-company processes from the initiating of business, through provision of product information to Order2Pay business transactions.

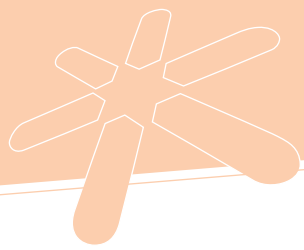

The task is to network the existing infrastructure and software in trade and industry. IWOfurn offers solution components to network the processes of business partners along the value creation chain for local use or as ASP service portfolio.

IWOfurn supports companies irrespective of size and technical requirements.

Rational cooperation thanks to technology standards!

IWOfurn interconnects heterogeneous technologies.
